#### **DETAILED ACTION**

1 The application of Fong "Keyboard with translator function" filed on December 16, 2003has been examined.

Claims 1-3 are pending.

### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3 Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by US patent of Ikemoto et al., (4,636,977).
- As to claim 1, Ikemoto et al., discloses a keyboard (Item 3 of figure 1) with functions of a translator is comprised of a microprocessor (Item MPU of figure 2), containing translation software (See figure 6) connected to a LCD (Item 1 of figures 1-2) provided on the upper part on the surface of the keyboard (Col. 1,

Art Unit: 2635

lines 67-68; Col. 2, lines 1-5), the word pending translation being entered by pressing the keys on the keyboard, then processed by the translation software to display the word translated on the LCD (Col. 2, lines 15-68).

As to claim 2, a keyboard with functions of a translator as claimed in claim 1, further, Ikemoto et al., discloses the microprocessor is connected to a speaker through a phonetic circuit to sound the correct pronunciation of the translated word (Col. 2, lines 26-27; Col. 3, lines 54-64; Item 4' of figure 1).

## Rejections - 35 USC § 103

- The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.

Art Unit: 2635

- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 7 Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over lkemoto et al., in view of US publication of Hung et al., (20030095288).
- As to claim 3, a keyboard with functions of a translator as claimed in claim 1, Ikemoto et al., discloses a stand alone a keyboard with functions of a translator, it is inherent that, the microprocessor and its peripheral circuit are connected to a battery built in the keyboard or to an external source for the keyboard to independently exercise its translation function, however, Ikemoto et al., does not expressly discloses. However, Ikemoto et al., does not expressly disclose a keyboard with functions of a translator being connected or used with a computer. In the similar filed of endeavor, Hung et al., discloses a keyboard to function independently (Page 2, Par. 0022; Items 200, 270 and 280 of figure 2)

It would have been obvious, to one of ordinary skill in the art, at the time of the invention, to modify the keyboard with functions of a translator of Ikemoto et al., by incorporating the portable keyboard of Hung et al., in order to have a keyboard with functions of a translator, wherein, the microprocessor and its peripheral circuit are connected to a battery built in the keyboard or to an external source for the keyboard to independently exercise its translation function when the computer is shut off, because Hung et al., discloses a keyboard apparatus for that may be usable with a hand-held electronic device and a computer and

Art Unit: 2635

skilled in the art would recognize the portable keyboard may be desirable to have the same keyboard perform multiple tasks.

#### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following cited arts are further to show the sate of art related to keyboard with translator function.

In the US Patent (4,809,192) Washizuka et al., discloses a language translator with a speech synthesizer, fixed words and variable words messages with translation are selectable.

In the US patent (4,897,651) DeMonte discloses a keyboard for the input of data with a selective symbol display and a keyboard using this key.

In the US patent (5,865,625) Baskerville discloses an electronic flash card apparatus for the use of translators.

In the US publication (5,865,625) Ford discloses a universal display keyboard, system, and methods.
